

VERKADA OVERVIEW

Smarter Security Made Simple

Built with IT in mind, Verkada eliminates the existing complexities of enterprise video security with a modern solution that is simple to install, easy to use and secure on your network.

Bringing Efficiency to IT Operations

With Verkada, your organization instantly gains greater visibility, user management and situational awareness without impacting IT resources.

Reduce Bandwidth Impact

At just 20-50 kbps, Verkada's hybrid cloud cameras provide real-time visibility into your organization without impacting your network.

Easy to Use

From any device, users can quickly access and filter the footage they need, export evidence and manage cameras and user-based access.

Zero-Touch Maintenance

As new features, performance and security enhancements are released, cameras receive automatic firmware updates without adding unpredictable risks and costs.

Committed to Cybersecurity

- **End-to-End Encryption**
 All data is safely secured in transit and at rest with AES 128 and 256.
- **Secure Connections**
 No open ports or VPNs — cameras only send outbound requests via HTTPS/TLS.
- **SAML/OATH Authentication**
 Integrate with leading SSO and 2FA security vendors including Okta, Duo and more.
