

A Smarter Way To Secure Your Space

Cloud-powered physical security built for simplicity, reliability and limitless scale.

OVERVIEW

All-in-One Physical Security

Verkada combines enterprise video security and access control into a seamless, natively integrated platform. From Command, Verkada’s centralized cloud-based management platform, users can simultaneously monitor door-based events with correlated video footage across their organization in real-time.

Hybrid Cloud Video Security

Available in a wide-range of form factors, Verkada’s line of hybrid cloud cameras leverage powerful on-board processing to deliver advanced AI analytics insights across your organization.

All cameras include built-in video retention, including options up to 365 days of continuous recordings.

Cloud-Based Access Control

Built from the ground-up, Verkada’s access control solution is designed to bring plug-and-play simplicity to managing doors, users and credentials across their organization.

Key Benefits

Simple to Install

In just minutes, cameras and door controllers come online and are ready to use.

Plug-and-Play Design

No need to set up VPNs, open ports or advanced security configurations — ever.

Limitless Scale

Add as many cameras, doors, credentials and users across any number of sites.

CLOUD MANAGEMENT

Strengthen Security, Simplify Management

Verkada Command provides users with an all-in-one solution for managing their organization to accessing and investigating events.

One Platform to Manage All Devices

Centrally manage and access all cameras and doors from any device.

Stay Ahead With Automatic Updates

Benefit from always having the latest security and feature enhancements.

Actionable Insights in Real Time

See what is happening across your organization instantaneously.

Secure By Default

All data—in-transit and at rest—is fully encrypted without any configurations.
